

2022 Briefing on admission to the Department of Advanced Interdisciplinary Studies, Graduate School of Engineering, The University of Tokyo

“The RCAST Graduate School” - Broad Scope, Deep Research-

RCAST Director
Masakazu Sugiyama

Associate Professor
Hideki Yoshimoto

Lecturer
Yu Koizumi

RCAST does more than just conduct research. The provision of education is another of its key functions. Students enrolled in the doctoral programs of the Department of Advanced Interdisciplinary Studies, which is operated by RCAST, can receive a graduate school education while simultaneously conducting research at specialist research units (ancillary labs). At the Cross Talk, Associate professor Hideki Yoshimoto and Lecturer Yu Koizumi, who work on the frontline of research and education, will describe the characteristics and attractions of researching at the Research Center for Advanced Science and Technology. After the Cross Talk, we will have the Briefing to provide information about the Application Schedule B of the entrance examinations to be held in January. Anyone is welcome to attend. Those planning to seek admission this year will obviously benefit, but so will those who are considering admission as an option for the future and want to learn more, as will those who have been surprised to discover that such a graduate school exists.

28 Sep (Wed.), 2022

At KOMABA Research Campus and Online

Part1 Cross Talk by RCAST Members 17:00-18:00

Part2 Briefing session 18:00-19:30

Register at google form below by 27 September.
